TECH WALK THROUGH

(2 minutes)

Hey guys! We are here on the inside of the Sandtray Suite. I'm going to give you guys a quick walk-through of what to expect and how to access everything. So mine is going to look a little bit different than yours because I do have admin privileges, but I did want to give you again, a heads up of what this is going to look like.

So here, I want you to get started on the welcome course. You can access that, very first off here, and if you are starting, of course, we want you to start with "What to Expect If You are Beginning." So, you're just going to click on that, then it will come up here, and you can write your comment over in this side and we will have resources available there, at the bottom to where you can download all kinds of different stuff depending on what the video is. So, if you want to get back to say, The Welcome Module here, then you can go back here, and it tells you what you have done and what you haven't done. So, yeah, we've got all that kind of stuff and then after you get finished with that, you will be able to move on to the next module.

So, let's talk about some monthly deliverables. This is something that's new with the re-vamp of the Sandtray Suite and so I'm super excited about that. To each month we will have a guest expert that will be coming in and teaching us all about what they do and how that relates to Sandtray. So the first one will be starting in August, talking about Tammi Van Holinder, and then we'll have Robert Jason Grant and then Pam Dyson. And if you're needing to look and see, ok, well where are all of this stuff? What I want you to do is to go up here, you see this calendar. You can click on that, and it will take you and you'll be able to see the Launch Party coming up here. Then if you go over here we've got Greatness Sticks and then the Challenge and we will be adding all of these in a very very quick order for you guys. Again, what else we have over here, we have resources. This is where all the different stuff that I refer to within the videos is landed so it's really easy for you to access all of the different stuff like coupon codes, your "No Fail" Script, all that kind of good stuff.

Now here's where the magic happens, the community. I want you guys to all join us on Facebook, if you haven't already because that's where we're going to be delivering a lot of stuff through Facebook that's going to help you out on your journey. Of course, if you have help, you can click on that, and we will get you fixed up real fast.

So, one of the last things that I wanted to tell you guys about is the #AskAmy. So each month we will be having what I call a 10 in 10. That's where I answer 10 of your questions in ten minutes, and not really ten minutes, it's probably, it's a lot more than ten minutes. But this is where you're going to send your questions for me to answer, and I'll be doing that live through Facebook. So, I want you to make sure that you have access to that, and really utilize that. Don't ask it through Facebook if you're needing a more detailed answer and you want my undivided attention to things that get lost in there. So make sure you go up here to #AskAmy. Here is the account here, you can go and you can update your profile, and change you email and password, here. So, we've got all kinds of stuff that once, and again, mine's not here, because I don't have access because I'm an admin, but this is where you're going to be able to change your profile photo, and then the settings, all of your (what am I trying to say?) the credit card information, all that kind of good stuff, will be here. So, yeah, super excited about getting all that ready for you guys. We have an. . .This will be improving, and we're going to be adding all kinds of cool stuff to it, over the next week even, so come back and make sure you visit this very frequently, but before we get started with our monthly videos here, what I want you to do is to get started with all of this core videos. That there are several videos here that I want you guys to go through, and you'll have to go through one, the other, and you'll see, and I'll talk about why that is, throughout the rest of the module as well as the other ones. So, I hope that helps a little bit. And, again, do not hesitate to hit myself, or come up with any questions. So, WELCOME, WELCOME, WELCOME!
